

## Chrome-Extensions for TPro.

### **Step 1st:**

Reffer this link for download the extension

<https://github.com/gitPrasanna/Chrome-Extensions>

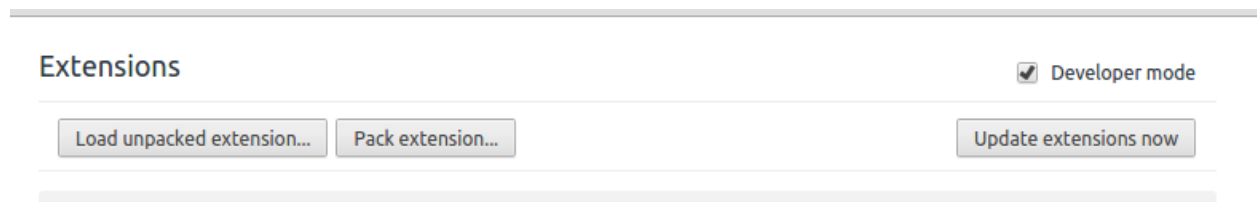

Download the .zip file clicking on Download ZIP button.

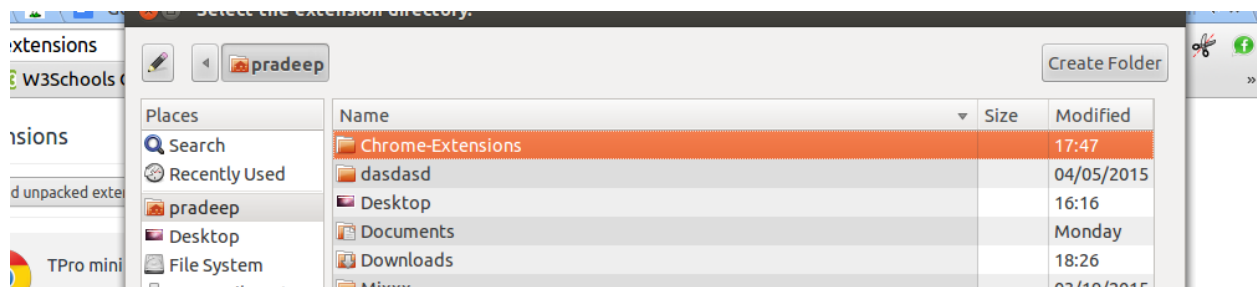

### **Step 2:**

When you download the zip file, extract it anywhere you can find. :P

Then open your chrome web browser and go to this link -> chrome://extensions/

Clicking "Load unpacked extension..." button, you can select the extracted extension folder.

Then you can see newly added extension in chrome://extensions/ page as well as top-right-corner of browser.

Now you have installed successfully the chrome extension!! 😊

~~~ Guys, please help me. I want test this by you. You are my QA & BIR guys 😊 ~~~
